

COMP1820: Introduction to Compilers

Tutorial 1

1. Create syntax trees for the following expressions:

- a. $z = (3x + 7) * 2/y$

- b. $x = \sqrt{2y} + 5z$

- c. $x = \frac{-2y+3}{8z}$

2. Set up and ensure that you can access the Unix environment for future tutorials. Instructions can be found on:
